

Timber! IS THE OFFICIAL NEWSLETTER OF TOLLESON LUMBER COMPANY

NO LOADING OF TRUCKS IN THE RAIN

As always, we do not load trucks in the rain. Please make your drivers aware of this policy. The only exception to this is if we hear from you (the buyer of the lumber) and you let us know in an email that it is OK for your truck to be loaded in the rain.

Your drivers are welcome to sit and wait for the rain to subside if it is raining when your driver arrives at our mill.

If it looks like there may be a chance for rain we will start loading your truck from the back if your driver is willing to throw the tarp as we get you loaded. Again that has to be your call — once we start loading it is your lumber.

WE DON'T SHIP WET LUMBER!

Safety First: Attention Hard Hat Area!!

Just a reminder that effective immediately all visitors to Tolleson sawmills are required to wear protective head gear while on Tolleson property. This policy includes all truck drivers and delivery personnel. Please notify your truck drivers and/or any trucks that you hire on the outside. We appreciate your compliance with this safety measure.

Tolleson Lumber Launches New Website

After months of hard work Tolleson Lumber Company has a new web site. Take a minute and go to www.tollesonlumber.com to check out this much improved webpage that includes many helpful features.

Have a look at the **Resources** heading which has an MSR Comparison Table that compares the MSR 2400 that we make to SS, DSS, #1 and #1 Dense. Under the Resources tab you can also find MSDS information in a downloadable format. There is an online credit application as well as information on nominal vs. actual dimensions of lumber. Also included under Resources is list of industry links that contain helpful information.

Under the **About Tolleson** heading you can read a brief history of Tolleson Lumber Company and view a timeline of important events in our company history. Here you can also find our official environmental statement, take a look at our locations, get directions to our mills, read short biographies of our executive team, or look at back issues of TIMBER! Newsletters.

The **Products** heading on our site is where you can find grades and pack sizes of all products that we produce including 1", 2", industrial/short items, and export lumber. There is also information here on our remanufacturing plant and the products that we are able to produce at that facility.

Don't forget to check out the **Sales** heading to see a mug shot of your favorite salesperson. Under Sales you are also able to view our official terms of sale.

To find contact information on anyone in our procurement division you can head over to the **Forestry** heading.

Our **Careers** heading will be updated on an ongoing basis as new opportunities arise at Tolleson Lumber Company.

Is there something you were hoping to see on the website that wasn't there? Send an email to your salesperson and let them know what you'd like to see included. We are constantly looking for ways to make our website a better resource for our customers and prospective customers.
