Flooring, Beaded Ceiling, V-Joint, and Other Patterns in Perry

A lot of people do not know it, but Tolleson Lumber also has a remanufacturing plant adjacent to our sawmill in Perry, GA. We currently have a Weinig Molder, band and trim saw, and Holtec in operation. We can produce all types of pattern and other specialty products. A vast majority of the lumber we consume at our reman plant is manufactured at our own Perry and Preston, GA sawmills. This allows us to control the quality of our products and is an added bonus for our customers because they are already familiar with Tolleson's excellent reputation for lumber quality. So the next time you need some pattern or specialty products, please give us a call because we are ready to serve you.
